Michael Allen 83-122-91 Crittenden

Bill Hardin, state drug dir.; 618- fax 618- 10-3-00

fed legis; '88, initiated '89

organized around judicial districts

still use that as basis for organization; have some gerrimandered some counties around;

some where we incorporate one or more jud districts into a grouping

jud dtfs which i fund, there are 20;

the fed funds that come down under edward byrne grant; funding source for fed money; with state match money; that money comes to the ark drug council, as gov's drug dir, i chair

the drug tf in pine bluff; jeff, lincoln, ark counties; one tf, made up of two jud districts; i put money there, but they also receive a sep grant of fed money; it's a dea grant; they applied for it separate;

capt. James bacon; with pbpd; tri-county drug task force coord; 870-543-

.....

We cover all but pulaski and perry counties; those are the only two counties which do not participate in this fed dt program; in lr, you have dea, fbi, sheriffs; they are inundated with strike forces and state police; they have monies and groups organized to do what rural groups can't do on their own, which is basic reason for dtfs.

So it's not an issue of larry jegley having a prob with it, he has all the law enf he can deal with, they run into one another out on the street

as opposed to ashley county, where not so many....

....

I don't disperse any money into crit co; my money goes to brent davis, and he organizes tf in those counties; and whether crit co for whatever reason chooses to particiapte, that's up to the pros atty;

it's strictly a voluntary program; there are no hard and fast rules about who shall and who shall not; should, in 2nd, city of jboro choose not to participate, they would not;

would not receive money to operate; would not receive asset forfeitures;

strictly up to them;

.....

By legis, the money starts with the pros's drug control fund; that money is put into fund; agencies who comprise that tf create a board of directors and that board, indep of all other 19, determine the method they choose to disperse seized money

so in 2nd, may be that the pros says, i take 10 percent off top for my office expenses; jpd, this was your case, you get 70 percent; craighead so, you came in late, you get 10 percent, etc

so it's up to the indiv control board iwthin that pros dist how they reimburse or split up assets or forfeited funds; on a seizure by seizure basis, based on whatever agreement or formula they have

by legis in ark; 250k per incident; anything over 250k is directed to my word—superfund, acct in state treasurer's office; 250k stays locally, by legis, that money is earmarked to go back out to anyone and everyone who is participating

if you're sitting at intersection of i-40 and i-55, better than someone on hwy in harrison

.....

This is statewide by statute, any law enf agency;

.....

I don't consider seized drugs as assets; can't by auction or any other means

vehicles, personal prop; real prop; weapons; proceeds that a pros and a judge deem having been obtained from sale or manuf of illegal drugs; vehicles, there's a process now requiring court order before sold at public auction or used by law enf; whereas prior to two years ago, one could simply ask someone to forego claim to vehicle; could be done by side of road

now law enf agency notify you by writing, approp time to appeal; has to be heard by court; so we're not into that biz of roadside immunity; so we have eff stopped that old practice

other prop follows the same course; if your home is searched by a search warrant and law enf can convince pros, affidavit, proceeds from drug sales—boughth with—court makes ruling whether returnable

.....

Records on seizures; i don't have; not sure those records were maintained; two years ago, we tried to start documenting; there was not a reporting system in place, no one designated to try to capture that information

two years ago; 800k to 1.3 million was best we could come up with, bec there was no reporting requirement on law enf or pros

we are now doing that, by statute requiring ev agency in state 340 law enf who are req to notify us by dollar value and by inventory whta they have seized and what they are req a court to forfeit

fed, state, local match money, plus some local

as i understand the sense of the times, these task forces would be (temporary)

.....

When dh was operating the way he was operating, this office, i wasn't here, i don't know whta they viewed their job to be, or requirements placed on them

we now have people here who actually work here, whereas once upon a time, it was a statutory position, member of gov's staff who had other duties

we're going out all time, looking at records; we are putting personal oversight; think they appreciate what people are doing;

we're monitoring, pros are being held accountable; we've initiated process wehre i have to be told within five calendar days of every stop made; we track those right through final disposition of court clerk, we compare initial list of items versus list that judge signs off on; making that a proper seizure; ask for documentation, too much money being owed; money returned, items destroyed

..

Butch reeves was immed predecessor; orig when this office was created;

fed monies from doj, justice assistance program; into df a in ark, office of inter govt services; that office tells me how much fed money we have in fiscal year to put out

df and a have been there; bi-annual reporting records on stats for doj

but the kinds of records that i want to keep, there just never was an office;

first guy, never had a staff; think asp had assigned one person to help him; my salary is slot on gov's staff, i do not have a staff, there is no money budgeted for this office; nor has there ever been; so when i took this over year and a half ago; i started borrowing this and borrowing that and trying to make a functional office out of it, and through legis of '99, at least i have authority to try to bring some continuity

there are these 20 groups to cover 73 counties; i have resp to try to keep these operational and in some working order, but i don't have the authority to do that; nothing about who they can hire, what they have to report; other than confiscation reports, but i cannot pick up phone and say

Could require that they meet min standards for ark law enf; so i would prefer that all be cert law enf officers, background checks done; when you have drugs and you have money, you'd better have twice as many fail-safe checks; we try to double up on who has the inventory and who has the keys

the best of all worlds, create a drug task force and that agency head assigns one of cert officers to work under the dtf coord, he is resp there and back to head of his agency;

once found that a tf would be operated; not staffed by local law enf; dan harmon just went out and hired whomever he wished, and that's who you had out on the highway; not accountable to anyone other than who hired him

i don't have that statutory authority; but believe this, those organizations out there are satisfied that somebody has come in and tried to organize; there were so many black marks on these drug task forces that they weren't viewed that awfully well by fellow law enf and public

i have nothing to do with, asp, highway police, pulco, any entity which chooses not to participate; i have no—even imagined—authority.

They operate under whatever tenents that local entity requires

there is not a state bureau of narcotics; other states, some are part of dept of public safety; crim inv div state police; that has just never happened here, and i;m making no pretense to make anyone believe I'm sitting here as a state bureau of narcotics

many state do; more often than not there is a central narcotics statewide effort, and I'm as close as we come here

asp has statewide narcotics group; work in all 75 counties; but limited by number; if this statewide bureau were to exist; get everyone doing the same business the same way, that would centralize, at least in concept, the effort

what i would hate to see another statewide organization sitting in lr and people in (remote) counties not getting localized services;

off of drug dir rel to asset seizures and forfeitures—

that will be every blasted one, that 340 statewide; started reporting late July 1999;

request by agency; and county

re: Crit. Co drug task force
jewelry case
dive team

Maj. Larry Gleghorn, ASP in HS; 9-11-00

supp they were misuse of evidence, maybe

working that stretch of interstate, drug interdiction, forfeitures; vehicles; real prop, seized; esp guns; being handed out amongst the officers for safe-keeping

documentation was real bad as to where everything was at; refrig or guns; various odds and ends; being utilized personally by people assd to task force

crit co had their own task force;

89-95--

during the time of that trial, we were contacted by fed-ex

byers had bought some jewelry, fed-ex del iv; somebody else signed, he sold to eye dr in j'boro, contacted fed-ex and said he'd never gotten

we arrested, or had warrants, and fed-ex

they refused to prosecute; fed-ex; we were assisting their inv; and whenever we solved the crime and recovered the jewelry; fed-ex didn't want to testify or pros or have any more to do it, they just said thank you very much

and another thing, think we were getting poor cooperation out of pros office, bec at that time, they didn't want to interfere with inv of those three murders

.....

paid informants; files should be open for foi after cases adjudicated;

at one time WMPD had myself and mike davidson come over and review their case, to see if there was anything they'd missed

until then, offer of assistance was rejected; but that's nothing uncommon; they declined; felt they were capable; we seldom help local pds; they have their own detectives

that dive team was out of LR; request went through LR office;

besides malfeasance of office of drug task force; we were bailiffs for trials; special request from burnett; because of all the threats; so I was in charge of security for both trials

i was there every minute; no doubt in my mind they did it.

I had to smoke Byers off Steve Barnes in Paragould; making threats, he went the other direction

Mike Davidson—

there was an investigation; prob '93, '94; think Agent Dale Arnold, now at Forrest City

they had an agent die; that was a separate inv; from that came some allegations that he was inv in some things;

that was a homicide inv; two guys in Tenn convicted of poisoning him.

A question regarding Harmon

Congratulations are due to the FBI agents who investigated Dan Harmon, to the U.S. attorneys who prosecuted him, and to the jurors who convicted him earlier this month of running a racket under the guise of law enforcement. The first job of justice is to keep a clean house. This scouring was way overdue.

Harmon was a corrupt prosecuting attorney. He was also the corrupt head of a federally funded Drug Task Force. The combination gave him incredible power--power which he abused.

Harmon was convicted of using illegal drugs at the same time he was sending others to prison for drugs. Worse, he was convicted of extortion, of running a shake-down operation out of his elected office.

Residents of the 7th Judicial District, which encompasses Saline, Grant and Hot Spring counties, have only gradually become aware of the stench emitting from the courthouse at Benton. That's why they voted Harmon voted out of office last fall. But Harmon has hardly been discreet in his flaunting of the law. In past years he has been found guilty of failing to pay his taxes. He has refused to take drug tests when arrested. He has been accused of battery by several women, many of them his wives or ex-wives. He boasted of once having struck a fellow lawyer, an attack that was witnessed by a judge. And, on top of all of that, federal investigators had evidence as much as seven years ago that Harmon was involved with drugs. But the man was never even censured, much less removed from office. Only now that he stands convicted of felonies will his license to practice law be taken away.

It is hard to imagine how much damage Dan Harmon did during the years he held office as prosecutor. Cases that should have been prosecuted were not. Cases that should not have been prosecuted no doubt were. Hundreds of citizens who learned of Harmon's way with justice directly through their own experience or through that of friends and relatives walked away from the courthouse cynical.

Harmon ran what a lawyer in Pulaski County recently described as "a reign of terror" in the counties he was sworn to serve.

All of that raises the question of why the man was not stopped earlier. It could have happened.

- Former U.S. Attorney Chuck Banks could have brought his evidence against Harmon before a federal grand jury. He would not.

- The Committee on Professional Conduct, which supposedly monitors lawyers' behavior, could have yanked Harmon's license for his refusal to submit to mandated drug-testing when he was held as a

federal prisoner, or censured him over his indifference to state and federal tax laws. The committee took no action.

- The judge who witnessed Harmon's attack on a fellow member of the bar could have challenged Harmon early on. He did not.
- The police in Benton could have pressed charges against Harmon for his alleged physical attacks and death threats against his then-wife, Holly DuVall Harmon. But though the attacks happened time and again, the police did press charges.

And those are just the most obvious failures of the legal profession to correct abuses within its ranks. Less obvious but no less chilling are the opportunities that other judges, lawyers, and police passed up to put a halt to Harmon when they came across information that suggested what he was up to. Dan Harmon was not operating in a vacuum. It is impossible to believe that he operated a criminal enterprise out of his prosecutor's office for years, one of the crimes for which he now stands convicted, without a certain awareness from others in the legal community.

In a way, our system of justice is like a nuclear power plant. It's big, powerful, and complex, and it relies on elaborate systems of monitoring to make sure that it's running correctly. If someone becomes aware that someone else is asleep at the switch--or worse, is engaged in sabotage--it is incumbent upon the observer to report the problem and on management to immediately respond. Otherwise, no one is safe.

So too with justice. If part of the system breaks down--if someone is mishandling his job--the machine ceases to be of service and starts to become a threat. The longer the part malfunctions, the more dangerous the machine becomes. It is not unreasonable to say that, as with a nuclear power plant, when the justice system fails, lives--and, in fact, a way of life--can be destroyed.

We count on police, lawyers, and judges to monitor their ranks. In the aftermath of Dan Harmon's conviction, the citizens of Arkansas, and especially of the 7th Judicial District, have a right to ask the legal profession: Why did it take a federal investigation and a jury to stop him?
